# A Setup: ready before disaster strikes

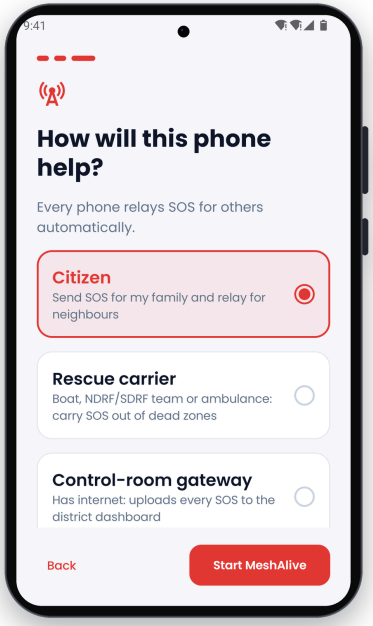

A 30-second guided setup, done once in advance, so the phone is ready when the network fails.

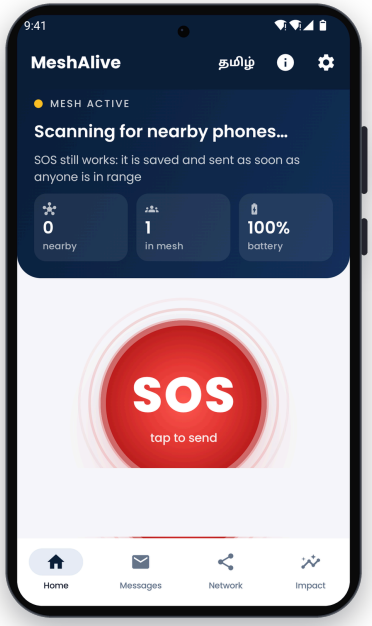

**Screen 1 · Welcome**
What MeshAlive does, in plain words

**Screen 2 · Language**
English or தமிழ்

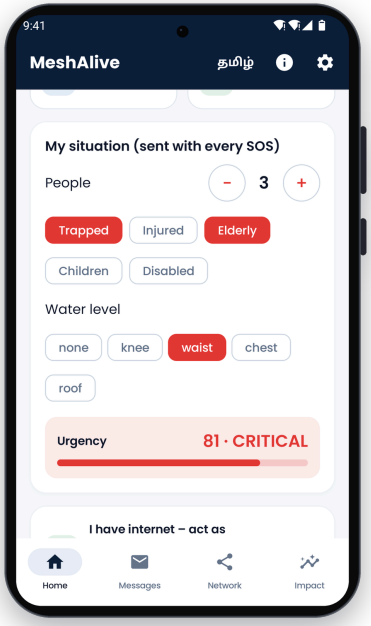

**Screen 3 · Role**
Citizen, rescue carrier or control-room gateway

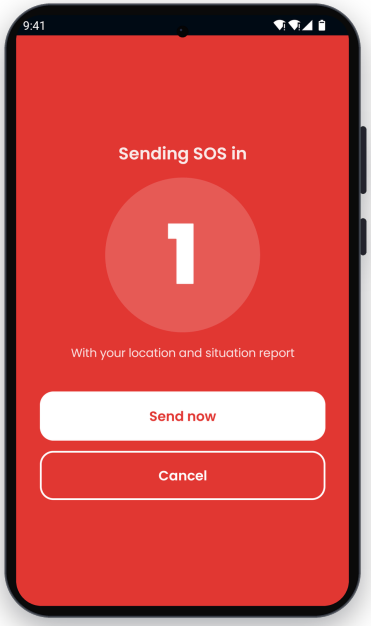

**Screen 4 · Home**
Live mesh status and one-tap SOS

## B Asking for help, with the right details

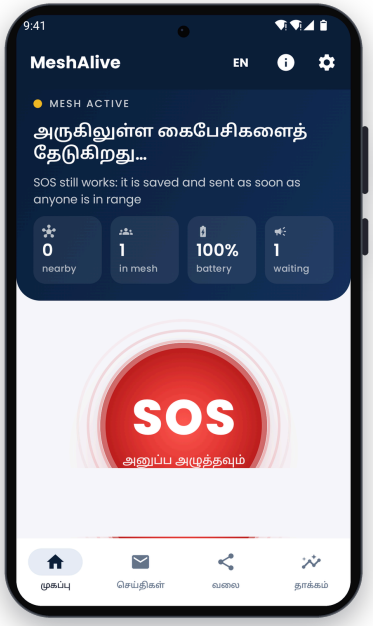

Every SOS carries the household's situation and an urgency score, so the most critical cases are reached first.

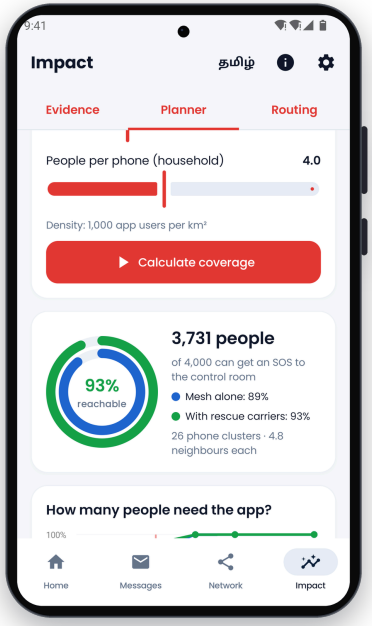

**Screen 5 · Situation report**
People, trapped, elderly and water level give urgency 81, critical

**Screen 6 · SOS countdown**
3 seconds with Cancel, to prevent false alarms

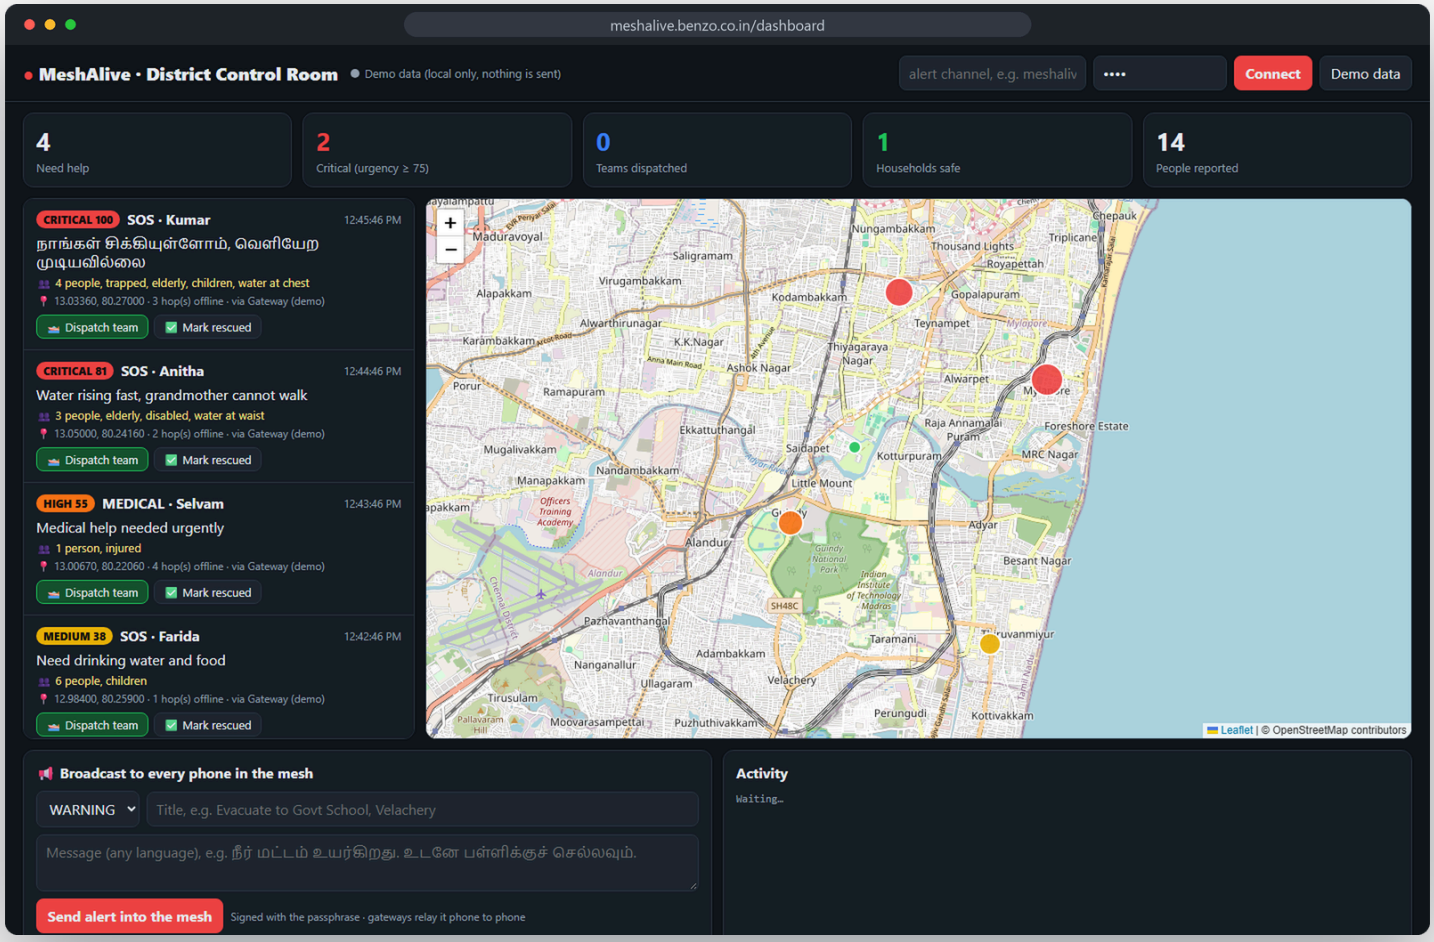

**Screen 7 · Tamil**
The full SOS flow in Tamil

**Screen 8 · District planner**
93% of people reachable in a 1 km² ward (model)

# c District control room

Every SOS on one live map, sorted by urgency. Operators dispatch teams, mark rescues and broadcast evacuation alerts, all digitally signed.

**Screen 9 · Control-room dashboard** (sample data), live at meshalive.benzo.co.in/dashboard
